

# JB JAMES CONSTRUCTION

Here at JB James Construction we are proud to be Trimble owners. As the construction industry grows and competitive work advances in our state, we are able to complete jobs at a much cost effective pace. In the past, jobs would take twice as long and double the man power to get done. Trimble machine control has come a long way and is improving more and more every day. As a surveyor, jobs require a lot less layout than in the past. Thanks to Trimble machine control everything they need to get the job done is right in front of them. Without Trimble Machine control we would not be able to compete in this competitive industry today.

Brandon Trahan

Survey Party Chief
