

# **North Louisiana Contractors, LLC**

**August 5, 2016**

**We initially purchased Trimble Business Center software, Base Station, Rover, and Dual GPS machine control for a dozer. After experiencing SITECH Louisiana's world class training and support, North Louisiana Construction Contractors, L.L.C. realized huge dirt moving productivity increases. NLA has increased our productivity by 100% while reducing our layout costs by 90%. We now finish the project as we move with virtually no rework. Typically, on a subdivision project we net 8 -10% profit. However, on our first full subdivision project with the guidance of SITECH Louisiana and Trimble products NLA's profit jumped up to 18%! We are excited for the future as using Trimble Business Center for our quantity dirt takeoffs has increased our bid to win ratio bringing us more work that is now even more profitable.**
